About Me

Experienced Web Developer with 7+ years working in Webflow and WordPress, plus practical UI experience with React. I build fast, polished, and user-centric websites using clean, efficient front-end code.

Education

Talisay City College

Bachelor's Degree in Industrial Technology

2014 - 2018

WORK EXPERIENCE

fare•well

Apr 2024 - Nov 2025

Webflow Developer | Support Specialist

- Build and maintain Webflow sites using the Client-First framework and component libraries (Relume, Lumos).
- Optimize websites for SEO, accessibility, performance, and responsiveness using tools such as Silktide, Ahrefs, and other industry-standard auditing platforms.
- Convert WordPress sites into fully functional Webflow builds.
- Integrate analytics, tracking, and CRM systems (GTM, GA4, GSC, HubSpot, etc.).
- Create custom automation workflows using Zapier and Make.
- Improve and optimize existing Webflow sites for SEO, CRO, and overall usability.
- Develop dynamic content structures using Webflow CMS and conditional visibility logic.
- Set up and manage Webflow E-Commerce for simple online stores.
- Build and refine reusable components to support scalable, multi-client development.
- Troubleshoot and resolve Webflow issues to ensure smooth site performance.
- Collaborate with the founder and internal teams to gather requirements and implement solutions.

DNA Micro Software Inc.

Jan 2023 - Mar 2024

React Native - UI Developer

- Create UI and app components from wireframes and prototypes
- Work with native modules when required
- Write tests to ensure top performance
- Fix bugs in the application
- Boost front-end or client-side performance by eliminating performance bottlenecks
